

China project - Accounting & Auditing

Customer:

A German supplier of computer components

Initial situation:

The German company had previously had a bad experience with Chinese accountancy firms and had changed to an American accountancy firm, which was however only able to offer standard solutions.

Order:

Execution of the accounting & auditing

Procedure:

Following a consultation in Nuremberg, for the last 2 years accounting & auditing tasks have been successfully undertaken by our Hong Kong accountancy firm using Western principles of accounting and consideration of Chinese law.

The customer received an individual adaptation of the service tailored to their needs and was thoroughly satisfied. Furthermore, they saved up to 16% in charges compared to their previous supplier.
