

China project - Tax Consulting

Customer:

A middle-class management consultant who wanted to send its employees to China.

Initial situation:

The management consultant did not know how to deal with pay/income tax and Chinese taxes.

Order:

Explain Chinese taxation

Procedure:

The customer was extensively informed about the intricacies of the Chinese tax system. During this meeting the customer was also informed about the calculation and payment of the Chinese wage and income tax and their realization in the practice.

Results:

They were thoroughly satisfied. They told us that they had previously visited several large general-tax-consulting companies, which were only able to offer them standardized and expensive solutions, which did not match their special needs.
